Re: KNOW-FM, Minneapolis-Saint Paul, MN  
Facility ID No. 42949  
Minnesota Public Radio (FRN 0002-6425-10)  
Request for Extension of Special Temporary Authority

Dear Ms Dortch:

On behalf of Minnesota Public Radio ("MPR"), licensee of KNOW-FM, Minneapolis-Saint Paul, Minnesota, this is to request further special temporary authority to operate at variance with licensed parameters due to the temporary loss of antenna tower space. The current STA expires February 10, 2010.

As noted in MPR's original request for an STA, KNOW-FM's antenna had to be relocated on the tower (the "Telefarm Site Tower I") because of the construction of a new digital television station (WUCW TV). At the time of the relocation, the television station whose radio aperture MPR uses (KARE TV, a member of the Telefarm Antenna Partnership that owns the Telefarm site and towers) made a commitment to MPR in writing of its intent to return KNOW-FM as promptly as possible to a new but equivalent spot high on the current tower or on a neighboring tower ("Telefarm Site Tower II").

As previously reported, since the initial STA was granted, the parties have diligently worked together towards finding a way to move KNOW-FM to a new high spot. In the original STA request, we stated that the parties were considering combined operation with another broadcaster on one of the Telefarm Site Towers, which would enable MPR to move back up to its licensed height.

At the request of the licensees of the two other FM stations located on the Telefarm Site Towers, MPR proposed a formal Letter of Intent that provided for the creation of a Master Antenna Partnership. Each of the three radio licensees would give up their current space on their respective towers in return for the right to place a single master

antenna at the highest place available on the Telefarm Site Tower II at a COR HAAT of within three meters of KNOW's currently authorized facilities.

This master antenna would be a panel antenna, thus providing better circular propagation for the stations. It would be a slightly longer antenna than the stations currently use, allowing them to use less electricity to achieve their respective ERPs. It would utilize the most efficient HD radio transmission technique, also providing for the use of less electricity. The Letter of Intent provided for cost and revenue sharing, and anticipated use of the master antenna for other main or auxiliary transmitter sites serving the community. Each of the parties expressed interest in the project, and began discussions with the Telefarm Antenna Partnership (the owner of both towers) based on this proposal.

This additional STA is necessary because, when the Letter of Intent was proposed to the Telefarm Antenna Partnership (made up of three television stations located on the towers at the Telefarm Site), the Partnership responded that the proposal might receive their approval (approval must be unanimous), but only if the terms of revenue sharing were changed. This requirement was created as a result of a dispute that had earlier occurred among them relating to additional uses of the towers. The radio licensees worked through the issues raised by this requirement, in order to come to a new proposal. A draft was proposed and received initial positive indications.

However, several circumstances occurred subsequently, delaying commitment to the Letter of Intent.

The first circumstance is the severe recession that has affected virtually everyone in this economy, but especially the broadcast media, who are reliant on advertising for revenue. The economy has still not recovered in any sense from this recession, which many have called "the Great Recession". While interested in this proposal in principle, the parties have been reluctant to make capital commitments to so large a project without some confidence that funds would be available, especially in light of the following additional circumstances.

The second is the circumstance that the Commission has only recently completed consideration of authorizing an increase in the power for the digital portion of the FM channel. The proposed design of the master antenna would have been an efficient means of allowing each of the FM stations involved to broadcast in digital. However, that particular design does not appear to be as efficient in supporting HD radio signals at the higher power that is now authorized. The parties are reluctant to commit to this project without knowing the solution and cost of solving this new problem of higher powered HD signals. We are currently exploring that issue and making new cost estimates.

The third circumstance is the conversion of broadcast television from analog to digital, a conversion that was to have occurred in February 2009 but was delayed to June 12, 2009. This conversion created uncertainty about the rearrangement of antennas on the Telefarm Towers – some of the TV licensees are moving their digital operation from their initially assigned digital frequency to their legacy analog frequency and abandoning their “digital” antenna, others are abandoning their “analog” antenna for their “digital” antenna. The Telefarm Group indicated they were unwilling to commit to the master FM antenna, or the alternate individual antenna, until they could sort these issues, and their engineers continue to work on this problem.

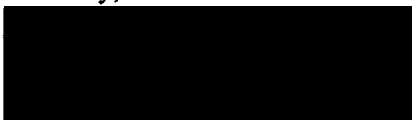

MPR has reason to believe that this Master Antenna Partnership will come to fruition, providing a desirable long term solution. Alternatively, the movement or removal of TV antennas on the Telefarm Towers might open an aperture for the KNOW antenna at the desired height, obviating the need for the Master Antenna. In fact, there has been significant and positive discussion about this latter possibility within the last few days.

MPR therefore respectfully requests an additional grant of Special Temporary Authority for KNOW-FM to continue to operate as described in its previous correspondence.

Because MPR is a noncommercial, educational licensee, no filing fee is required with this request. An Anti-Drug Abuse Act Certification form is attached.

Please contact this office or our outside counsel, Todd Stansbury at Wiley Rein (202) 719-7000, if there are any questions.

Sincerely,

A large black rectangular redaction box covers the signature area.

Thomas J Kigin  
Executive Vice President

**Exhibit**

**Anti-Drug Abuse Act Certification**

The applicant certifies that, in the case of an individual applicant, he or she is not subject to a denial of federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C. §853a, or, in the case of a non-individual applicant (eg corporation, partnership or other unincorporated association), no party to the application is subject to a denial of federal benefits pursuant to that section. For the definition of a "party" for these purposes, see 47 C.F.R. §1.2002 (b).
