In the Report and Order in ET Docket No. 01-75, the Commission adopted coordination procedures for fixed Aural BAS stations above 944 MHz and fixed Television BAS (TV BAS) stations above 2110 MHz under Part 74 of the rules. The Commission adopted these procedures to conform the coordination procedures for fixed BAS, and Cable Television Relay Service (CARS) under Part 78, with those already in effect for Fixed Microwave Services (FS) under Section 101.103(d) of the rules. The Society of Broadcast Engineers (SBE) requested a stay of the effective date of the coordination rules, which was granted on April 15, 2003, delaying the effective date until October 16, 2003. A request for an extension to the stay was denied by Order DA-03-3215. Therefore the rules requiring coordination went into effect after October 16, 2003.

Pursuant to Section 101.103(d) of the Commission's rules proposed frequency usage must be prior coordinated with existing licensees and applicants prior to filing an application for a new station, major modification, or major amendment. In addition, pursuant to Section 101.103(d) applications are required to include a certification that frequency coordination has been completed and are required to provide a list of the entities with which frequency coordination was accomplished. You have responded "yes" to Item 7 of the Administrative information on your application indicating that frequency coordination has been completed for your proposed operation. We are returning your application to afford you an opportunity to update and amend your application to provide the required frequency

coordination in an attachment.
