**Frequency Coordination Certification and Supplemental Showing
Pursuant To:**

Section 74.502 or 74.638 – Frequency Coordination
Section 101.103(d) – Frequency Coordination Procedures

This supplemental showing and frequency coordination certification pertains to the request by **Minnesota Public Radio** ("MPR") to modify the existing WLI694 broadcast auxiliary license. Required frequency coordination procedures pursuant to the applicable sections of the Commission's Rules were followed for this application. The proposed changes to the existing facility represent a major change to the existing license.

Notification letters were sent to parties holding authorizations or pending applications for the frequency requested, or for frequencies overlapping the requested frequencies within a radius of 250 kilometers from the actual facility. Each of these coordination letters was dated May 29, 2015, and each was mailed from Canton, Illinois on May 29, 2015.

The parties to which letters were sent were asked to submit their comments, concerns, or objections in writing either via USPS mail or via e-mail within 30 days. By sending the coordination letters via USPS and by providing an email address for the submission of comments, it is believed that accommodation of potential delivery delays was achieved. There are no unresolved comments, questions, or objections concerning the facility as of July 15, 2015. It is therefore believed that MPR has made a reasonable effort to coordinate the facilities. The date of final coordination is assumed to be July 15, 2015.
